

Ultra-quick update on Arcadia

Alice Villeger, alice.villeger@manchester.ac.uk
SBGN 5, 2nd september 2009

What it does

- Open SBML file
 - interpret SBO terms as SBGN glyphs
 - generate corresponding SBGN PD diagram
- Browse the diagram
 - sort species and reactions
 - view selection properties
- Auto layout based on graphviz
 - can be edited manually (select, drag and drop)
 - or semi-automatically (neighbourhood view, clones, branches)
- Save or export
 - SBML + layout extension, SVG, PDF, PS...

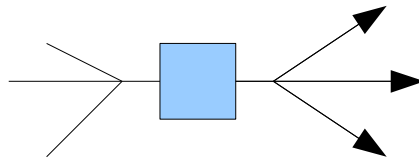

What it looks like

So what's new?

Not much really...

- Fixed layout bugs with process glyphs

- Fixed display bug with clone markers

Where to get Arcadia?

- Windows and Mac binaries
- Source code

<http://sourceforge.net/projects/arcadiapathways/>

Thank you
